

Mechanical Engineer opportunity

Required Skills & Qualifications:

- Knowledge of raw materials, production processes, quality control, costs and other manufacturing techniques
- Proficient in computer software programs such as SolidWorks 2009 and MS Office
- Knowledge of design techniques, tools, and principles involved in production of precision mechanical parts, drawings and 3D modeling
- Knowledge of the practical application of engineering science and technology. This includes applying principles, techniques, procedures and equipment to the design and production of various goods and services
- Excellent written and verbal communication skills
- A positive and cooperative team player attitude, multi-tasking and accuracy skills

The ideal candidate would have:

- Bachelor of Science in Mechanical Engineering or equivalent
- 3 to 5 years of industrial experience, preferred
- Good problem-solving skills and a creative approach for new ideas
- The ability to work under pressure and to meet deadlines

Key Responsibilities:

- New product design and development, and improvement of existing product lines
- Mechanical drawings, layouts, subassembly and 3D modeling using SolidWorks 2009
- Prepare engineering analysis of projects to include preliminary design, calculation, equipment life cycle, etc.
- Develop testing procedures, product testing and testing reports
- Design calculations supporting new and existing products
- Other duties as assigned

Rem offers a competitive salary, a comprehensive benefits package, RRSP matching & bonus programs, educational & health allowances, and advancement opportunities within the company.
